

Family & Personal

Portraits

I would love to work with you to create lasting memories for those you love.

I believe we should all exist in photo's, whether that is in family portraits or a more stylised portrait, those that love us want to remember us as we are today.

Let's talk about the images you would like to create for you and your loved ones.

I will customise your session around you. Your portrait session is all about you and bringing you to life behind the camera. It is my role to coach you and to capture the images that will flatter you and make you wish you could do this every day.

At your viewing, you will be able to select from up to 20 portraits to be printed and displayed in a studio box, or ready to hang on the wall.

Create lasting memories with Portraits by Caro

Are you looking for family portraits?

*A portrait is not made in the camera
but the other side of it*
– Edward Steichen

*Are you looking for stylised personal
portrait?*

“A true portrait should, today and a hundred years from today, be the testimony of what kind of human being he was”

Philippe Halsman

Client Testimonial

“Caro was amazing and really took the time to make all members of my (some somewhat resistance to photographs!) family and the results show in the portraits she produced for us. We were all thrilled and I am so glad we have such beautiful images. I would recommend Caro to anyone”

*Genevieve Ostring
Generational Family Portrait*

Perfection is in the details

Dress for Success

Your wardrobe is important when creating your portrait session. Whether you are going for a casual or more formal portrait look you want your portraits to look like YOU!

A couple of things to look for are;

- choose colours that will compliment your location choice, neutral tones work best
- use patterns sparingly, and focus on adding interest with accessories and textures
- If you are been photographed with your partner or friends and family, make sure your colours work well together.

Professional Salon Services

Professional makeup is available on request, by a qualified make-up artist.

Having your hair styled and make up professionally applied can elevate your images to the next level.

If you plan to get your hair cut or coloured before your portrait session, please make the appointment 1 – 2 weeks before our session.

I encourage you to look after your nails and hands in the leadup to your portrait session. Make sure your nails are clean and manicured, if you are wearing polish check it is not chipped and the colour works with your wardrobe and makeup colour choice.

Location

I have a home based studio in Remuera which is perfect for your portrait and small groups.

I love working on location when it comes to family portraits, especially if your children are younger as parks and beaches offer a large variety of options and back-drops.

All my lighting and backdrop equipment is portable so I am able to work anywhere that suits you.

*Family is like branches on a tree
we all grow in a different direction
yet our roots remain as one*
